operations

> Next-generation operations leadership.

The Tepper School of Business is recognized worldwide for its academic and research contributions in the fields of Operations Management and Operations Research. One of our prized academic assets, Operations symbolizes the business school's pioneering leadership in the area of analytical decision-making. Corporations seek Tepper students' expertise in connecting the strategy and execution required among the many dynamic operations-related processes common in today's organizations.

The Tepper School offers the Global Enterprise Management MBA Track. This MBA Track combines the business processes from five fundamental areas at Tepper to provide exposure and knowledge for the challenges and opportunities of the global enterprise.

From JIT to virtual production, the school's Operations focus combines a rigorous core of methods and modeling with a strategic and global view. Numerous ideas and applications are emerging to change organizational operations in the future, and Tepper experts are spearheading many of the innovations. Agile manufacturing, customer-centric systems, Six Sigma, robotics, CAM and supply chain management are arenas in which MBA students leverage their analytical skills to develop and implement real-world solutions for marketplace advantage.

"My newfound love and respect for analytics has opened doors for me I never imagined possible, and it has also, without a doubt, given me a significant advantage over my peers."
