Flat Rate Tuition Model

All students entering the MBA program in Fall 2017 pay the same aggregate tuition of $128,000, regardless of number of enrolled units and/or delivery mode. Tuition generally will be charged as follows, depending on which category a student falls into during the semester of enrollment:

**Full Time MBA Students:** Flat rate tuition of $32,000 for each of 4 full-time semesters

**Part Time MBA Students (on campus and online hybrid):** Flat rate tuition of $16,000 for each of 8 part-time semesters (Note that semesters are Fall, Spring, and Summer with each semester made up of 2 mini semesters.)

Students who transfer between delivery modes (full time on campus, part time on-campus, and part time online hybrid) and students who complete their program early, still pay the same aggregate tuition. In cases where excess or under-tuition charges occur as a result of a student graduating early or taking a leave of absence for example, the under- or over-assessment of aggregate tuition will be settled in the final semester of enrollment with either a charge or a credit respectively to the student account.

Employer Tuition Remission/Sponsored Students

Students who receive employer tuition remission (and sponsored students) should be aware of the above tuition structure as it relates to their employer’s/sponsor’s tuition remission policy and should schedule their classes accordingly. For example, a part time MBA student first entering in Fall 2017 will pay $16,000 for tuition in each semester regardless of whether he/she is registered for the typical 24 units in that semester or for only 12 units in that semester. It is important for the student to understand the employer’s/sponsor’s reimbursement policy and the related financial implications in situations where the student does not follow the typical enrollment pattern. All MBA tuition for students first enrolling in Fall 2017 or later is assessed at a flat rate and the university does not provide translated, per-unit billing for employers and sponsors.
