Mergers and acquisitions play a key role in the growth and globalization strategies of multinational companies. However, many M&A initiatives fail when leaders do not consider the people dimension of change management. These post-merger integration issues are particularly challenging when they are across borders and include complex reorganizations.

Intense complexity needs to be managed effectively during the PMI process. The integration of organizational culture, cross-cultural, and leadership aspects of change management is imperative. Focusing on these areas, this highly interactive program places particular emphasis on the human element of the pre- and post-merger integration process. Participants leave with a virtual toolbox, designed to be an immediately actionable resource for any PMI or change management project.
