Carnegie Mellon University

Tepper School of Business

FULL-TIME MBA

Stand apart.
Tepper is a place for people who want to go deep — deep in friendships and deep in class work. My classmates were ready to go all in.

Christa Johnson, MBA '16
Associate, Leveraged Debt Capital Markets
Deutsche Bank

tepper.cmu.edu/standapart
Tepper MBAs teamed with CMU colleagues from the School of Design, the College of Engineering and the Innovation Institute to compete in the SpaceX Hyperloop Pod Competition. Ours was one of only 30 teams accepted from more than 1,500 applicants, placing 8th in this global competition. cmuhyperloop.com

Uncommon skills.

You’re excellent at what you do. You have the drive to achieve your potential, a curiosity about the unknown and a limited attachment to comfort zones. We call that a “good start.”

But you also realize the need to back up your decisions with more than a gut feeling and the need to strengthen your leadership skills in order to get things done. That’s what makes you the Tepper type.

Tepper MBAs possess an unrivaled advantage honed through our renowned approach to leadership development alongside advanced analytics. It’s an approach that prepares our graduates to make better business decisions and maximizes leadership skills for successful implementation of those decisions across the organization.

That’s why the name “Tepper” means more in the market — and why a Tepper MBA gives you the uncommon skills that allow you to stand apart.

carnegiemellon.edu
Take your next step by leaps and bounds.

Over 150,000 people will earn an MBA next year. Tepper MBAs are among the few who rise above that crowd. We prepare you to perform at a higher level through a command of cutting-edge analytics and advanced leadership abilities. As a Tepper MBA, you’ll have the rare tools and problem-solving skills sought by employers. That is why companies rank the Tepper School among the top 10 MBA programs in the nation, according to Bloomberg Businessweek (2016).

We make sure those employers keep you at the top of their minds. Our Career Opportunities Center (COC) provides one-on-one career coaching, on-campus recruiting, alumni networking, corporate presentations and a dozen student treks to major corporations across the country. The COC is consistently rated a “recruiter favorite” for preparing students to succeed.

tepper.cmu.edu/currentsalaries
The first thing you learn is that you love it.

This will be the most inspired, involved and engaged you’ve ever been. Because the connections you make here — with your professors, your peers and the campus you call home — will be unlike anything you’ve ever known.

Here, you’re not just a fraction of an oversized incoming class. You’re an integral part of an inclusive community. Our classes are smaller because we believe in a culture that values each individual. And for our students, that looms large. You’ll work closely with faculty who will know you by name, and with classmates who will motivate and elevate your thinking. You’ll be surrounded by some of the sharpest, most talented people you’ll ever meet, and they’ll care as much about your experience as you do.

But don’t worry. Even though we are small, opportunities still abound. Lead a student club (there are more than 40 of them), set off on a trek to Silicon Valley with your classmates during winter break, throw down your predictive modeling skills at a case competition, sample the seasonal offerings of the local brewpubs, or take a hike (or a run or a ride) on some of the 200 miles of riverfront trails nearby. You’ll be amazed at what two short years can hold.
Dive deeper and emerge above the rest.

Our curriculum develops leadership with an elevated analytics skill set. That's because we know that this combination is highly sought-after in the marketplace.

Optimization, predictive and prescriptive modeling, and a deep economic understanding are among the analytical tools all our students master. With a firm command of analytics, you’ll possess unmatched problem-solving abilities that enable you to identify optimal solutions.

At the same time, you'll build the leadership skills to put those strategies in motion. Our Accelerate Leadership Center provides expertise and training from coaches, instructors and mentors who are your partners for one-on-one assessment, development, planning and implementation. That's not something you'll find at other programs.

It's this combination that gives you the leadership and analytical skills to emerge above the rest.

The new center of the CMUniverse.

Imagine this: There you are, enjoying your coffee in the Tepper Quad hub — the dazzling B-school atrium flooded with sunshine — and beside you, two Carnegie Mellon engineering students are kicking around an idea for a new product that strikes you as absolutely ingenious. When you overhear them struggling with how to bring their idea to market, you’ll chime in, “Excuse me. I can help with that.”

In 2018, the new Tepper Quad will be open for business. Our new building will sit at the center of the Carnegie Mellon campus — elevating the business school as an inter-connected partner for all seven colleges and serving as the pivotal hub for exchanging ideas.

While you’re learning alongside management researchers and professors, you’ll interact at the Tepper Quad with entrepreneurs, architects, robotics designers, computer scientists and other brilliant, creative minds from around the world. And you’ll be taking advantage of it every day.

In the last decade, only one business school in the U.S. has been designed and built to occupy the very center of its university campus. (Hint: It’s us.) The Tepper Quad will include built-in garage incubators where students will innovate, collaborate and test new ideas.
Recruiters know that our military veterans possess a strong work ethic and have profound leadership experience as a result of their service. These qualities, amplified by the advanced analytic skills they cultivate in the Tepper MBA, create a powerful skill set that ensures success.

Get an alumni point of view of the Tepper School experience
teper.cmu.edu/standapart
I didn’t have the toolkit to excel in a supervisory role. That’s when I decided to apply to the Tepper MBA program—to get formal management training and hone my leadership skills.

Samantha Grant, MBA ’16
Human Resources Leadership Program
GE Healthcare

You’re in tight with an impressive crowd.

Every year, our new alumni start careers around the globe. But the remarkable thing is, the bonds they formed in B-school branch out and grow stronger. That’s what makes our alumni network such an incredible asset. Wherever you go, you’ll find it easy to make connections. Our alumni speak your language and open doors, anywhere in the world.
